

Challenge Accepted®: Garden City, KS

We had a long-time personal customer of the bank that decided to buy his family business.

As you can imagine, now you're having to come into the bank with 50 checks at a time... I know that would be a struggle for me.

I think we really just helped him organize the smaller parts of the business to make that part easier, making sure his statements were coming out right, making sure his checkbook was being balanced at the end of the month, just really trying to get him set into good organization for his business.

Helping us do what we're good at and helping them do what they're good at. To us, that's what Challenge Accepted® means.
