

## **Small Business Mobile Banking: Alerts**

Surprises can be fun, but not when it comes to banking.

With alerts, you can stay in control of your Commerce accounts from anywhere, anytime.

Set alerts to notify you by text or email when your balance goes below an amount you specify or when a deposit has been received. Alerts can also warn you of suspicious account activity for added security.

Get text messages when a purchase is made that's over your specified limit, your card is used online, by phone or at an ATM, or when a transaction is declined.

Alerts can confirm if your debit or credit cards are locked or unlocked, and whether any of the personal information on your accounts has changed.

Staying on top of your account activity with alerts can give you greater peace of mind. To sign up, simply log on to small business online banking at [commercebank.com](http://commercebank.com), click on "Customer Service" and select "Alerts."
