

## **Small Business Mobile Banking: Security**

Fighting fraud isn't just for superheroes. At Commerce, we empower you to protect yourself with digital tools that make it simple, and you won't even need a cape.

Set up online banking alerts to monitor credit and debit card activity. You can be notified if your card is used outside the U.S., online, over the phone, or by mail.

You can also be warned if a transaction exceeds your trigger amount.

Once you're set up, we'll text or email you if any of your selected events happens.

Easy, right?

But that's not all... Ever look in your wallet and notice a missing debit or credit card? No need to panic... Just lock the card with a flip of the switch from our Commerce Bank mobile banking app.

With our mobile banking app, you can monitor your accounts no matter where you are. And if you need to call for help, that's easy, too.

With our digital tool kit, you can help prevent fraud.

Commerce Bank: Challenge Accepted
