

1

00:00:03.150 --> 00:00:05.700

<v Narrator>Running a business is about so much more</v>

2

00:00:05.700 --> 00:00:07.430

than taking payments.

3

00:00:07.430 --> 00:00:10.480

Your point of sale terminal should do more too.

4

00:00:10.480 --> 00:00:12.040

Meet Clover Mini,

5

00:00:12.040 --> 00:00:13.780

the compact point of sale system

6

00:00:13.780 --> 00:00:16.543

that can handle whatever job you throw it's way.

7

00:00:17.410 --> 00:00:19.530

<v ->With us we needed that space to get around</v>

8

00:00:19.530 --> 00:00:21.410 line:15%

and if we had a big square in front of us

9

00:00:21.410 --> 00:00:22.830 line:15%

then we'd be fumbling around

10

00:00:22.830 --> 00:00:24.350

and it just wouldn't be space efficient.

11

00:00:24.350 --> 00:00:26.290

<v Narrator>With Clover Mini you can accept</v>

12

00:00:26.290 --> 00:00:28.840

more payment types quickly and easily,

13

00:00:28.840 --> 00:00:31.440

including contact-less and chip cards

14

00:00:31.440 --> 00:00:33.290

all while keeping payments safe

15

00:00:33.290 --> 00:00:35.690

with advanced security technology.

16

00:00:35.690 --> 00:00:37.890

<v Joe>Getting people through the line faster,</v>

17

00:00:37.890 --> 00:00:39.650

that means I'm getting more people in

18

00:00:39.650 --> 00:00:40.870

and if that line is moving

19

00:00:40.870 --> 00:00:42.190

people are less discouraged

20

00:00:42.190 --> 00:00:43.380

and more willing to stand in it

21

00:00:43.380 --> 00:00:46.010

when they see that it's flowing at a good pace.

22

00:00:46.010 --> 00:00:47.910

<v Narrator>And for your growing to-do list</v>

23

00:00:47.910 --> 00:00:49.850

you'll find an app in the Clover App Market

24

00:00:49.850 --> 00:00:51.710

that can take care of business.

25

00:00:51.710 --> 00:00:53.920

From tools that help you manage inventory

26

00:00:53.920 --> 00:00:56.900

and employees, to analytics and reports

27

00:00:56.900 --> 00:01:00.500

that require no interpretation, Clover's got you covered.

28

00:01:00.500 --> 00:01:03.614

<v ->It's an ease of use that I really like</v>

29

00:01:03.614 --> 00:01:05.520

because you can search what you want.

30

00:01:05.520 --> 00:01:06.900

You can search the day you want.

31

00:01:06.900 --> 00:01:08.500

You can search the time you want.

32

00:01:08.500 --> 00:01:09.860

A matter of fact I feel more motivated

33

00:01:09.860 --> 00:01:11.580

to track that stuff now

34

00:01:11.580 --> 00:01:15.290

that I'm not going through, you know piles of paper.

35

00:01:15.290 --> 00:01:17.450

<v Narrator>Clover Mini connects with Clover Station</v>

36

00:01:17.450 --> 00:01:18.790

and many other terminals

37

00:01:18.790 --> 00:01:21.720

to make it work best for your business.

38

00:01:21.720 --> 00:01:23.360

And with Clover in your corner

39

00:01:23.360 --> 00:01:26.810

you've got endless options as your needs change.

40

00:01:26.810 --> 00:01:30.510

You deserve a solution that does more than accept payments.

41

00:01:30.510 --> 00:01:33.663

Clover, big possibilities start here.
