

Challenge Accepted, Claims Payments, Laura: Transcript

We met with a gentleman who wasn't getting paid due to the government shutdown. He had just been involved in an accident and needed the money from his claim immediately.

His insurance company was using our Claims Payment solution. This solution replaces paper checks with digital payments so that you can get your funds in near real-time.

He was really happy with the level of customer service that he received, which is exciting because I love helping our clients look good to their customers.

That is Challenge Accepted.
