

Jason Markovich: Transcript

I started as a part-time Teller at a branch and it really took off from there.

I went from part-time teller, to full-time teller then I moved into the Customer Contact Area and I've been there ever since.

One thing I enjoy most about working at Commerce Bank is really the people. The people to me are what makes me come to work day in and day out.

I enjoy my job, it's very people oriented, it's very customer focused, and I really enjoy the interactions that I have with not only my team but others within the company.

I started at Commerce Bank with a foot in the door approach, and wanted to continue build my career.

and Commerce has allowed me to do that.

Commerce has given me the ability to not only grow myself but help me watch others grow through their professional careers as well.

If you're looking for something to start out at, if you're looking to grow within a company, looking for new challenges

This will probably be the last job you'll ever have.
