

Commerce Bank Chip Cards Video Transcript

The world keeps getting smarter.

Shouldn't your card be smarter, too?

Introducing chip technology, a more secure way to pay with Commerce Bank credit, debit, and prepaid cards.

Simply insert the card with the chip side up, and follow the prompts.

Remove the card when the purchase is complete.

Chip technology generates a unique, one-time code a feature that's virtually impossible to replicate by counterfeit cards, to help eliminate in-store fraud.

The card can also be used with a traditional swipe when a chip-enabled terminal isn't available.

Or at an ATM with a PIN when needed.

Simple.

Secure.

Smart.

Chip technology: a more secure way to pay in the U.S. and abroad.

And with zero-liability protection, you're never responsible for fraudulent purchases on any Commerce card.

Commerce Bank chip cards: enhanced security for your world.
