ROAMpay™

Transform Your Mobile Device into a Secure POS Solution

With the rapid expansion of mobile technologies, Commerce Bank recognizes the importance of empowering its merchants to accept payments anywhere. That's why we are offering our merchants ROAMpay, an industry leading application for mobile payment processing. ROAMpay enables businesses to transform mobile phones and tablet devices into secure point-of-sale terminals capable of processing major credit cards, such as Visa®, MasterCard® and Discover Network®.

Convenient to use

ROAMpay is simple. It requires two items you already have – your current cell phone or tablet and your current data plan. ROAMpay is available for use on over 200 mobile devices and all major carriers. Even if you don't have a data plan, you can pay-as-you-go for the data you use. Plus, ROAMpay can serve as a virtual terminal. This means you can securely enter credit card payment infromation from your computer's desktop through ROAMpay's web interface.

Process transactions securely

A ROAM Card Reader is a small mobile swipe attachment for your cell phone that allows you to swipe card transactions. Fully encrypted from point-to-point, ROAMpay encrypts the credit card information at the swipe, elevating safety and security on every transaction.

Key Benefits

- Real-time authorization
- EMV Chip* and Sign mobile acceptance device
- Online reporting
- Email receipts to your customers
- Quick activation – 15-30 seconds to load application to a phone
- Benefit from lower card-present rates
- Mobile swipe device
- Mobile swipe device connects through your device's audio input jack - no special adapters
